# SCC 2017/6.0

Subject

Transitional scheme for SCC 2008/5.1 to 2017/6.0

Version SCC 2017/6.0 (the Safety, Health and Environment Checklist Contractors, SCC) was published on 02 April 2018. This replaces the previous version, SCC 2008/5.1.

The following transitional scheme has been adopted:

- › All certificates must be based on SCC 2017/6.0 by no later than three years and six months after the publication date.
- › Contracts for certification concluded from three months after the publication date must be based on SCC 2017/6.0.
- › Contracts concluded within three months after the publication date may still be based on SCC 2008/5.1, provided that the initial audit is conducted within six months after the publication date.
- › A shorter transitional scheme is applicable to foreign certificates<sup>1</sup>. These certificates must be based on SCC 2017/6.0 by no later than one year and six months after the publication date.
- › The certification body will inform the companies it has certified of this transitional period and will reach agreements on the migration method for the current certificates. Preference is given to migration during a scheduled audit.

<sup>1</sup> These are certificates issued to foreign companies (from states other than the Netherlands and Belgium) and to Dutch and Belgian companies with branches outside the Netherlands and Belgium.
